

Forest School March 2020

At Forest School this Half-term we have been learning about Spring, we have learnt about what the signs of Spring are and talked about Easter and where the tradition of Easter eggs comes from. In Switzerland a cuckoo delivers Easter eggs, in Germany a fox delivers Easter eggs. In the UK we have the Easter bunny. We looked around the site for signs of Spring, we found buds on trees, new plants growing, birds singing and building nests. We split into teams and built nests big enough for each team to fit into. When we were building our nests we talked about what nests were made from, where they are built and why certain materials are used. We then had hot chocolate and a biscuit to warm up as the weather wasn't so kind to some of us. After this we dismantled our nests to leave the site as we found it. Then we had some free time to explore and play games.
